TJ9MD Cameroon –update

There's very little time left. Everything is ready to go; this year has really suffered from numerous setbacks and reorganisations, but we're here.

TJ9MD will take off on November 2nd to be operational, hopefully on the 3rd night with a couple of stations and then start assembling the entire setup on November 4th!

As always 6 and 160 will be the last bands we will activate, we hope for good openings, and believe that the VOACAP forecast prepared especially for us will be useful to you:

TO8FH Mayotte –now QRT

The TO8FH DXpedition to Mayotte took place between October 10-22, 2023. Co-leader, Patrick F2DX, showcases the DXpedition with a neat video: <https://youtu.be/7aCQxJlwyFA>

T2C Tuvalu –now QRT

Our adventurous and lightweight DXpedition T2C is coming to an end. The climate on the island is challenging: temperatures never fell below 27°C with very high humidity. We even had three days without any rainfall and others with heavy rain.

The people on the island are very friendly, but after three weeks we have covered more or less the whole ground. All operators are very satisfied with the result given the simple antennas and

significant space restrictions. We had lots of fun. The last station will be QRT around 10 UTC October 30. We have reached more than 110 k QSO plus roughly 4,000 QSOS from CQ WWDX SSB. <https://www.dx-world.net/t2c-tuvalu/>

V26P Pulap Atoll (OC-155) & V62S – Satawal Atoll (OC-299) –update October 30 By Cezar VE3LYC

'This afternoon we met with the deputy mayor of Puluwat, with whom I had a very nice chat, explaining the scope of my project. He was very receptive, and I invited him at the hotel, so that I can show him some photos from previous operations, as well as more information about our program. He accepted and we spent a good couple of hours talking about amateur radio and IOTA. My contact joined us too, after which I invited them for dinner. He will contact tomorrow morning the people on the island in order to decide where exactly they are going to host me.'

FT4GL Glorioso Islands –update

The team decided to postpone Operation Glorioso 2023 scheduled for December. The reason for this postponement is due to the advisory committee of the Glorieuses des Terres Australes et Antartiques Françaises (TAAF) nature reserve, which was unable to comment due to a schedule incompatible with our initial request, an unfavorable opinion was given. therefore been returned. Even if it is a disappointment, the operation is not cancelled as Marek is planning to return to Les Glorieuses in 2024 as part of his professional activities. The operation is therefore postponed until March 2024. A new file will be created and represented, as soon as we have reliable information, we will keep the DX community informed.

VK9XGM Christmas Island –update

'We've been contacted by Ben, DL6FBL, who is leading the upcoming 4W8X operation. 4W is in a similar geographic region to us, starts 2 weeks before us but overlaps our entire spell on VK9X, and is altogether, a MUCH bigger operation than we two guys can mount. Ben is obviously concerned about mutual QRM from each other's pileups. We have certainly had this experience on our previous trips and it can make life very difficult.'

We have said to Ben that we will do our best to check the band mode segment we intend to use in order to try to avoid placing our pileup on top of the 4W8X signal. We expect the 4W guys to respect us and do the same. This is basic courteous operating of course, no one has the right to any frequency. Of course, we cannot control exactly where anyone calling us will actually transmit when we 'listen up', but we understand the conventions of how far up the band guys might transmit on CW or SSB. We will NEVER, EVER deliberately place a pileup on top of another expedition. We also understand that sometimes our pileup will inevitably inconvenience other casual operators. We ask for everyone's patience and understanding.'
